Presentation

A series of crazy, funny animation films get a live soundtrack on the spot from two impressive musicians: Rémi Decker and Raphaël De Cock. These two multi-instrumentalists have a thing about the bagpipes but they can play almost anything! Expect great images, strange sounds, a jaunty jaw harp, a groovy banjo, those quirky bagpipes of theirs and a lot of noise. A varied and original film concert!

!!!! IMPORTANT !!!! : mention "**in collaboration with Filem'On**" + logo if possible (see "pics").

[ENG] Some things to check for a perfect screening of the cineconcert:

- *playback always starts from the start of each video (never continues from where you previously stopped it)*
- *audio from the native video should be disabled (no audio)*
- *be sure no navigation bars show up on projection screen when moving the mouse, putting on pause etc...*

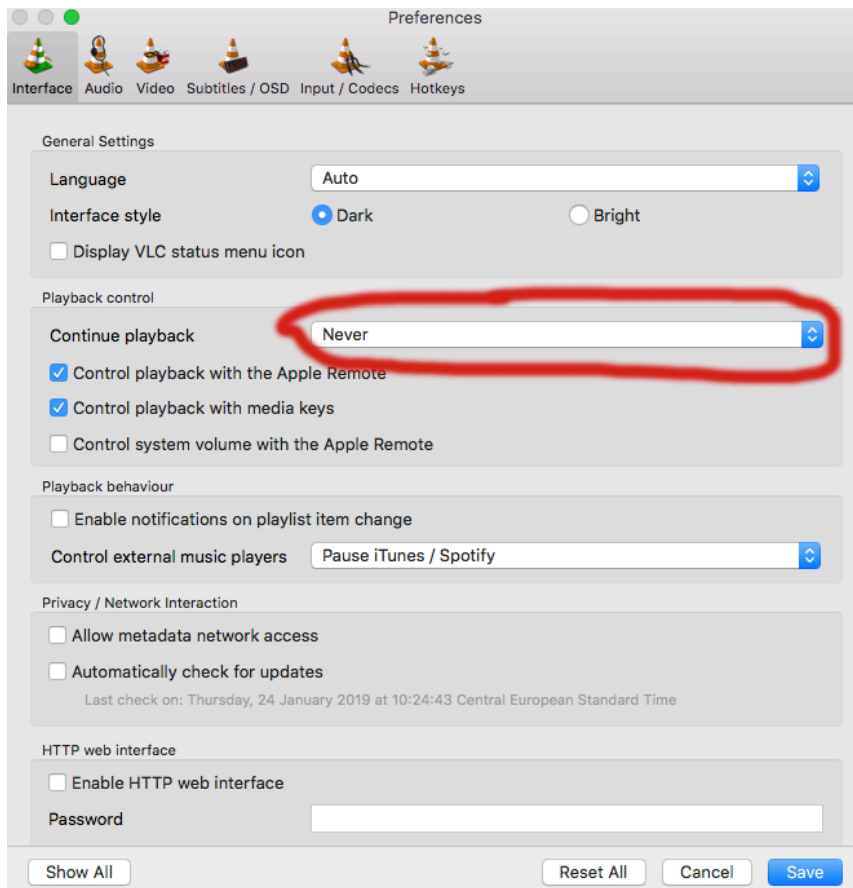

[FR] Merci de vérifier ces quelques petits détails pour une projection sans accros:

- *la lecture de chaque vidéo commence TOUJOURS du début (et pas de l'endroit où on l'a arrêtée la dernière fois)*
- *le son de la vidéo originale doit être désactivé (pas d'audio)*
- *s'assurer qu'aucune barre de navigation n'apparaît lors de manipulation de la souris, de mise sur pause etc...*
